Pruning shear extension assembly Instructions

1. Loosen the 2 fixing screws.

2. Connect the plug to the end of the scissors.

3. Insert the scissors into the cover of the case.

4. Screw the fixing screws.

5. Install the harness.

6. Long press the button, you can freely adjust the extension.

7. Connect the battery to the end of the pole.

8. Turn on the battery, pull the trigger of the pole and start pruning work.

9. This is what the pruning shears look like with the extension installed.

Note:

1. The battery must be disconnected before disassembly and repair.
2. Make sure that the mechanical parts are connected to the power supply after installation correctly as indicated in the installation instructions.
